PROFESSIONAL SUMMARY

Computer science graduate (UNH 2023) with Java/AWS internship experience and responsibility in teaching, hospitality and county operations. Starts with the practical problem, tests what can go wrong, and documents how the system behaves. Uses LLMs as a responsible developer uses Stack Overflow: reviews suggestions, understands the code and tests it before use.

EXPERIENCE

May–Sep 2022, full time · May–Sep 2023, part time

Telematics Backend Development Intern (two summers)

Liberty Mutual · Remote

Same telematics team both summers. Offered a full-time TechStart software engineer position.

- Developed Java backend components running on AWS Lambda to parse and transform vehicle telematics data for an auto-quote eligibility and scoring pipeline.
- Built unit and integration tests for serverless data-processing services, validating transformations and downstream interactions. Resolved defects through peer code review.
- Documented service behavior, implementation details and handoff procedures that the full-time engineering team adopted. Worked through daily standups, sprint reviews and demos.

Apr 2026 – Present

Golf Course Operations

Sandridge Golf Club · Indian River County · Vero Beach, FL

- First line of troubleshooting for POS and booking-system issues; resolve or escalate to county IT and vendors.
- Coordinate pro shop, maintenance and county administration to keep play on schedule.

PROJECTS

2025 – Present

Catch 5

iOS Card Game and Learning App (In Development)

Swift, SwiftUI, Swift Testing, GitHub Actions · github.com/cmurphy1140/catch-5

- Developing an app for playing and learning Catch 5, with a standalone rules engine, computer opponents and save/resume functionality.
- Tested illegal moves to confirm the game stays unchanged; evaluated bidding changes with mirrored benchmarks.

2026 – Present

Cyber-Physical System Assurance

Home Automation Field Study

Swift, XCTest, WebSockets, OpenAPI

- Developed a Swift client that reads device state after a command and reports confirmed, unconfirmed, failed or refused outcomes. This separates request success from observed state.

2026 – Present

Drive Score

Telematics Pipeline Prototype (In Development)

Python, Kafka, PostgreSQL, pytest

- Developing a telematics pipeline with synthetic trips to revisit the data-reliability problems encountered at Liberty Mutual.
- Built and unit-tested components for disk buffering, trip validation and duplicate detection.

EDUCATION

May 2023
University of New Hampshire
B.S. Computer Science · Durham, NH

SKILLS

Languages: Swift, Java, Python, JavaScript (Node), SQL.
Testing: Swift Testing, XCTest, pytest, unit and integration tests.
Cloud and tools: AWS Lambda, Step Functions, S3, DynamoDB, Git, GitHub Actions, Xcode.
Practices: code review, Agile (Scrum), CI, LLM output verification.

OTHER EXPERIENCE

Nov 2025 – Apr 2026
Server, Bartender and Catering Orchestrator
Post & Vine · Vero Beach, FL

Sep 2024 – Oct 2025
Lead Substitute Teacher, Physical Education & Health
Birches Academy · Salem, NH

- Planned and delivered K–8 PE and health lessons, adapting to student needs and changing schedules.
